

# BACK IN THE DAY

In this project you will compare current prices of everyday products to the prices from one hundred years ago. Read the directions listed below carefully and follow them completely. You may seek help at any time.

Choose at least 15 everyday products and research their current cost and cost from approximately 1917. You must compare similar products so don't pick a product that wasn't available in 1917 such as a smart phone. You are encouraged to use the suggested links provided below but you are free to choose your own source for information as long as the source is credible. All sources must be cited with the exact http address (see examples below). All work must be shown to receive credit and you can refer to the scoring rubric for a guideline.

Product	Current Cost	Cost in 1917	Percent Increase
---------	--------------	--------------	------------------

---
