

NBA Statistics II Information Sheet

Read the directions carefully and make sure you provide **ALL** of the requested information and include complete explanations when required. For this project you are to research current and former NBA players to determine who were the top 10 players of all time. ***Comparing centers with other positions is difficult to do so the only criteria is that your list must either be all centers or all other positions.*** Complete the statistics worksheet, and completely answer the questions below. The players may be from the same team or from different teams. You may use any credible source to collect the data but it is strongly encouraged that you use <http://www.basketball-reference.com>. All data must be from the current NBA season.

Scoring Rubric:

Worksheet: 75 points

~all information is provided and accurate

Follow-Up Questions: 25 points

~answers are supported by facts from the worksheet

~each answer should contain at least three complete sentences

~answer is thoroughly and clearly explained

If you have questions or concerns please feel free to contact me before the due date.

List your top-10 players of all time and write at least two complete sentences supporting their placement in your top 10.

2.

3.

4.

5.

6.

7.

8.

9.

10.

What other information might be useful to help determine the best overall player? This information may or may not be contained in a box score or game summary. Carefully consider all of the factors that are involved in a basketball game.

Which statistic do you think is the most useful in determining a player's value? Which is the least useful?
